

Global e·dentity™ Files First Patent

Multimodal Biometric and Digital Identity Patent Filed

Wilmington — Global e·dentity™, filed its first patent March 2, 2018

Within six months of formation, Global e·dentity™ has filed its first patent. The patent is directly relevant to multimodal biometrics and digital identity.

“We just filed a game changing patent,” said Robert Adams, Founder of Global e·dentity™. “We have discovered a new and unique way to non-invasively authenticate an individual’s identity in a manner that will provide a secure foundation for all types of digital identity for the coming millennium while respecting the individual’s privacy,” he said.

Global e·dentity™ is a rapidly moving leader in the field of multimodal biometrics to both increase accuracy of authentication and greatly reduce hackers ability to spoof identity.
