

Global e·dentity™ receives Seed Funding

Multimodal Biometric and Digital Identity Company Receives Funding

Wilmington — *Global e·dentity, received initial seed funding this November from a Washington, D.C. entity for a ten percent stake in the company.*

Recognizing the opportunity to fundamentally change the way digital identity is authenticated and protected, a Washington D.C. entity has provided the initial round of seed funding for Global e·dentity™. Funding will be used to ramp up engineering and marketing efforts and to deliver an initial prototype.

“We appreciate both the financial support and the belief in our mission,” said Robert Adams, Inventor and Founder of Global e·dentity™. “The seed funding will help us accelerate our efforts to bring game-changing technology to market,” he said.

Global e·dentity™, is a rapidly moving leader in the field of multimodal biometrics that include proof-of-life measurements to both increase accuracy of authentication and greatly reduce hackers ability to spoof identity.
